User Story Requirements

Project: RechargeMate

Summary: RechargeMate is a mobile application designed to simplify the process of recharging prepaid mobile accounts, providing a seamless, secure, and user-friendly experience. It integrates multiple payment gateways and offers a wide range of recharge options to become the go-to solution for mobile users requiring quick and reliable recharge services.

User Registration and Authentication

US-001: User Registration via Mobile Number

Priority: Critical

As a Prepaid mobile user, I want to register using my mobile number and authenticate via OTP, so that I can securely access the app.

Acceptance criteria

Given a new user, when they enter their mobile number, then they should receive an OTP for verification.

Given a user with a valid OTP, when they enter it, then they should be successfully registered and logged in.

US-002: Social Media Login

Priority: Critical

As a Prepaid mobile user, I want to log in using my Google or Facebook account, so that I can access the app without creating a new account.

Acceptance criteria

Given a user, when they choose to log in with Google, then they should be redirected to Google's authentication page and logged in upon successful authentication.

Given a user, when they choose to log in with Facebook, then they should be redirected to Facebook's authentication page and logged in upon successful authentication.

Mobile Number Recharge

US-003: Recharge Mobile Number

Priority: Critical

As a Prepaid mobile user, I want to recharge my mobile number by selecting my telecom operator and choosing a recharge amount, so that I can top-up my mobile credits.

Acceptance criteria

Given a user, when they select a telecom operator, then they should see available plans and offers.

Given a user, when they enter their mobile number and select a recharge amount, then they should be able to proceed to payment.

Payment Gateway Integration

US-004: Integrate Multiple Payment Gateways

Priority: High

As a Prepaid mobile user, I want to use different payment gateways like PayPal, Stripe, and local banks, so that I can securely complete my transactions.

Acceptance criteria

Given a user, when they proceed to payment, then they should see options for PayPal, Stripe, and local banks.

Given a user, when they select a payment gateway, then they should be able to complete the transaction securely.

Given a user, when they complete a transaction, then they should have the option to save their payment details for future use.

Transaction History

US-005: View Transaction History

Priority: Medium

As a Prepaid mobile user, I want to view my past transactions, so that I can keep track of my recharge activities.

Acceptance criteria

Given a user, when they navigate to the transaction history, then they should see a list of past transactions with details such as date, amount, and status.

Given a user, when they view a transaction, then they should see detailed information about that transaction.

Multi-language Support

US-006: Support Multiple Languages

Priority: Medium

As a Prepaid mobile user, I want to use the app in my preferred language, so that I can have a better user experience.

Acceptance criteria

Given a user, when they set their language preference, then the app should display content in English, Spanish, or Mandarin based on their choice.

Given a user, when they change their language preference, then the app should immediately reflect the change in language.

Push Notifications

US-007: Receive Push Notifications

Priority: High

As a Prepaid mobile user, I want to receive notifications for successful recharges, failed transactions, and promotional offers, so that I can stay informed about my account activities.

Acceptance criteria

Given a user, when a recharge is successful, then they should receive a notification confirming the success.

Given a user, when a transaction fails, then they should receive a notification with the failure reason.

Given a user, when there are promotional offers, then they should receive notifications about these offers.
